

# WHAT'S NEW FOR WRITE-ON

## FEBRUARY 2005

### **Chromium (Total Cr-Cr VI screen)**

Electronic submission of Chromium (Total Cr-Cr VI screen), STORET Number A-044 will no longer be accepted for loading into the DHS WQM database and any EDT submission of Chromium (Total Cr-CR VI screen) will now be rejected.

The use of A-044 was of limited duration, and was to be used ONLY as a hexavalent chromium screening tool, for purposes of DHS' Unregulated Contaminants Monitoring Requirement (UCMR). Under the UCMR, testing for hexavalent chromium was to have been completed by December 31, 2002, so A-044 is no longer appropriate.

If this is a routine analysis of Chromium (Total), the correct STORET Number is 01034 and can be found on the Write-On input form in the Inorganic Chemical section. If data has been submitted using A-044, please resubmit your data using the correct ID for Chromium, Total (01034).
